ANNOUNCEMENT

Central Board of Irrigation and Power and CIGRE India jointly with Maschinenfabrik Reinhausen GMBH, Germany is organizing "Conference on Modern Technology trends in Power Transformers including OLTC, Bushings etc.", on 27-28 February 2019 at CBIP Conference Hall, New Delhi.

AIM & OBJECTIVE OF THE CONFERENCE

To achieve the objective of providing Reliable, Uninterruptable (24x7), Affordable and Quality Power for all, high availability & reliable operation of major assets of the power system assume tremendous importance in such a scenario. The transformer being one of the most important and expensive assets in a power system plays an important role in availability and reliability of the system. It forms an important link between source of generation and the load centers or the consumers of the power. Emphasis needs to be laid on the improved design, quality control during manufacturing, maintenance & safety during operation of such vital/critical equipment. The management of such vital assets, when they are in service /operation as well as when they have outlived their expected life / at the end-of-life, is a challenging task for all utilities in a reformed power sector.

In view of the recent advancements & innovations taking place at a fast pace, it is extremely necessary for the professionals to update their knowledge. With the aim to acquaint the concerned professionals/engineers about the latest innovations in this field, CBIP had organized several conferences on the subject in the past. These conferences were found to be very educative for the professionals and were also appreciated by engineering fraternity in the country. Keeping this in view, Central Board of Irrigation and Power and CIGRE India jointly with Maschinenfabrik Reinhausen GMBH, Germany is organizing "Conference on Modern Technology trends in Power Transformers including OLTC, Bushings etc.", on 27-28 February 2019 at CBIP Conference Hall, New Delhi.

The aim of the conference is to provide a forum for open discussions and exchange of information on the latest state-of-the-art technology to come out with positive/concrete recommendations on the subject. It will be appreciated that it is very necessary for the professionals to capture the latest knowledge and innovations so as to keep the pace with the advancements taking place in this sector. By participating in this conference you will have the opportunity to meet the eminent experts on the subject, in order to build up a state-of-the-art view on the new requirements; solutions proposed and expected improvements for the future of the substation.

TOPICS TO BE COVERED
