

# CONTENTS

Foreword (iii)

## PLENARY SESSION

1. Metallurgy of erosion of under water parts in hydro electric projects  
– *D.B. Goel* 1

## RESERVOIR SEDIMENTATION

2. Assessment of sedimentation pattern and frequency of flushing for a small reservoir – A case study  
– *V.G. Bhawe, Neena Isaac and P.B. Deolalikar* 15
3. Sedimentation in Mangla reservoir – Effects on power generation system and mitigation measures  
– *Syed Muhammed Mehar Ali Shah* 29
4. Observed siltation in reservoirs in Maharashtra, based on surveys conducted by different techniques and its comparison with designed rate  
– *M.S. Mundhe, V.B. Pandhare, S.K. Kalvit and D.V. Thigale* 36
5. Uncertainty analysis in reservoir sedimentation  
– *J.S. Yeoh* 45

## RESERVOIR SEDIMENTATION : MODELLING METHODOLOGIES

6. Increase in power generation by trapping the objectionable sediment from the flow  
– *P.K. Bhargava, R.K. Gupta and K.P. Singh* 63
7. Assessment of silt deposition rate in the reservoirs in Maharashtra state  
– *M.S. Mundhe, R.V. Jaltare, S.J. Patil and H.P. Mande* 77
8. Mathematical modelling of long-term sedimentation of reservoirs  
– *Gerrit Basson and M.A. Ning* 81
9. Numerical model analysis for reservoir sedimentation and reservoir flushing of 775 MW Luhri HEP (HP) India  
– *J.K. Sharma, R.S. Chauhan and Deepak Nakhasi* 93

## DESILTING MECHANISM

10. Use of scouring and construction sluices and outlets for silt removal and increasing the efficiency of hydroelectric projects  
– *M.S. Mundhe, V.B. Pandhare, M.B. Nakil and S.R. Vaijapurkar* 105
11. Bypassing of high sediment loads at Nathpa Jhakri hydroelectric project - A case study  
– *S.S.H. Tulsianey, C.M. Shah, M.K. Verma and P.B. Deolalikar* 113

12. Role of periodic flushing of Nathpa reservoir in silt management at NJHPS-A case study  
– *R.S. Chauhan, S.S.H. Tulsianey and N.C. Bansal* 123
13. Sustainable reservoir operation: The submerged weir flushing system  
– *J.S. Yeoh and A.L. Warren* 130

#### **DESIGN CRITERIA**

14. Hydraulic design criteria for desilting chambers  
– *H.R. Sharma* 145
15. Design innovations & improvements for combating silt erosion of hydro turbines & valves  
– *R.K. Girdonia, Dinesh Kumar and K. Prasad* 153
16. Innovative use of technology to curb the menace of silt erosion in hydro turbines  
– *N.K. Swarnakar, V. Shrinivas Rao and Sachin Tripathi* 161

#### **DAMAGE MECHANISM AND THEIR ANALYSIS**

17. Mitigation of damage & O&M problems due to silt at Nathpa Jhakri hydro power station-1500 MW  
– *H.K. Sharma, J.K. Sharma and R.S. Chauhan* 171
18. A study of catchment of river Satluj, sources contributing silt and impact of silt on machines of Nathpa Jhakri hydro power station (1500 MW)  
– *J.K. Sharma and Kranti Kumar Gupta* 185
19. Mechanisms of hydro-abrasive erosion and solutions to counter these problems  
– *Kirsten Winkler and V.K. Pande* 205
20. Polyurethane coating-An economical solution to silt erosion problem of under water hydroturbine components  
– *A.K. Maiti and Pankaj Joshi* 216

#### **MATERIAL TECHNOLOGY**

21. Recent experience with coating-protected runners  
– *Roger Dekumbis and Dattatraya Aravind Karandikar* 227
22. Coatings for protection against silt erosion in hydro turbines  
– *Rahul Sood* 236
23. Duplex stainless steel - A prospective material for hydro turbines - -  
Its mechanical properties and erosion behaviour  
– *M.K. Sharma and A.K. Singh* 245
24. Combating cavitation erosion problem in hydro turbines - BIHEL approach  
– *Vivek Arya, B.K. Pant and B.S. Mann* 265
25. Erosion behaviour of HV of hard coatings under silted-water conditions in Vishnuprayag river hydro electric project  
– *M.K. Sharma, A.K. Singh, S. Prigent and G. Vuillerod* 273
