

Special Session on “GEOSYNTHETICS APPLICATIONS FOR MITIGATION OF NATURAL DISASTERS AND ENVIRONMENTAL PROTECTION”

PROGRAM OVERVIEW:

The catastrophic flood in Jammu & Kashmir and cyclone in Andhra Pradesh and Odisha are the worst recent disasters which have shaken the confidence of the nation in pursuing the infrastructure developmental models. In addition, the massive devastation which occurred in June, 2013 due to heavy rain and cloud burst followed by landslides, in Uttarakhand, has created a situation in the state which needs urgent attention. Geosynthetics, a very versatile material, has lot of scope for preventive measures to face such challenges.

The proposed Seminar will focus on versatile applications of Geosynthetics for mitigating the effects of floods on infrastructure, minimizing landslides, rock falls, debris flow, avalanches, etc.

PROGRAM PROFILE:

- Ground Improvement
- Reinforced Soil Structures
- Coastal and River Bank Protection
- Landslide Mitigation

METHODOLOGY:

The keynote lectures will be presented by both academic representatives and professional operators.

PARTICIPANTS PROFILE:

Decision-makers, project managers, consultants, designers, engineers, geologists, and technicians, involved with infrastructure projects.

DURATION:

01 Day

10 July 2015

VENUE:

Central Board of Irrigation & Power, New Delhi

REGISTRATION FEE:

There is no registration fee for participation in the Seminar. The participation in the Seminar by invitation only.
