

CONTENTS

	<i>Page</i>
Foreword	iii
1. Present Practices and Future Trends of Automation in Large Thermal Power Stations -- <i>Y. Radhakrishna Murthy</i>	1
2. Latest Trends and Future Prospects of Controls & Instrumentation in Power Plants -- <i>S. Bhattacharyya and R. N. Majumdar</i>	4
3. Controls and Instrumentation in Thermal Power Plants Prospects and Developmental Aspects -- <i>K. G. Srinivasan and N. Ramesh</i>	10
4. Instrumentation and Control in Power Sector – An Overview -- <i>Dr. P. R. Krishnamoorthy</i>	28
5. Technology Trends in Control and Instrumentation Systems for Thermal Power Plants -- <i>M. Verma and R. Prabhakar</i>	29
6. Emerging Trends of Future - Oriented Operation and Monitoring Systems -- <i>Dr. N. R. Namburi</i>	35
7. Innovations of ABB Kraftwerksleittechnik -- <i>Rainer M. Speh and F. Reibold</i>	43
8. Some Diagnostic Methods for Condition Assessment of Thermal Power Station Equipments -- <i>M. Kadloor, K. Mallikarjunappa, P. Sampatkumaran, K. Kumar and R.K. Hegde</i>	61
9. Operational Benefits of Integrated Digital Devices for Power Plant Protection -- <i>C. R. Hodgson</i>	73
10. Renovation and Modernisation of Control and Instrumentation System of Thermal Power Plants -- <i>R. K. Jain and Suresh Chander</i>	81
11. Renovation and Modernisation of Controls and Instrumentation in Thermal Power Stations -- <i>N. R. Banerjee and K. R. Bhardwaj</i>	87
12. Role of Modern Instruments in Energy Conservation -- <i>R. R. Kandade</i>	97

13.	Gas Analysis in Power Industries -- <i>V. K. Hamirwasia</i>	115
14.	Vibration Monitoring – Latest Trends and Some Key Issues -- <i>M. P. Srivastava</i>	121
15.	Adjustable Speed Drives -- Need, Requirements and Trends for the Automation to Reduce Auxiliary Power Consumption in Thermal Power Plants -- <i>R. K. Hegde and Dr. H. N. Shivashankar</i>	128
16.	Real Time Power Plant Training Simulators -- <i>Dr. H. C. Sharma</i>	136
17.	Strategic Plants for Control and Instrumentation of Indian Nuclear Power Plants -- <i>S. Ramakrishnan</i>	149
