

CONTENTS

Foreword	(iii)
Preface	(v)
1. INTRODUCTION	1
1.1 Biomass - Global Potential	1
1.2 Renewable Energy Scenario - India	2
1.2.1 Indian Power Scenario	3
1.3 Agricultural Scenario - India	7
1.4 Power Generation - Conventional versus Renewables	7
1.5 Biomass Power - Need and Relevance	8
2. BIOMASS FUELS IN INDIA	10
2.1 Types of Biomass	10
2.2 Characteristics of Biomass Fuels	10
2.3 Potential of Biomass Fuels in India	12
2.3.1 Biomass Availability	13
2.4 Present Use of Biomass	15
2.4.1 Biomass Specific uses	15
2.5 Seasonality of Biomass	16
3. BIOMASS UTILISATION TECHNOLOGIES	28
General	28
3.1 Thermo-Chemical Conversion Processes	30
3.1.1 Pyrolysis	30
3.1.2 Gasification	30
3.1.2.1 Classification of Gasifiers	31
- Fixed Bed Gasifiers	33
- Moving Bed Gasifiers	34
- Updraft Gasifier	34
- Downdraft Gasifier	35
- Crossdraft Gasifier	35
- Fluidized Bed Gasifiers	35
- Special Types	35
- Entrained Bed Gasifiers	35
3.1.3 Direct Combustion	35
What is Combustion ?	35
3.1.3.1 Boilers	37
3.1.4 Liquefaction Process	37

3.2	Biological Conversion	37
3.2.1	Bio-Methanation	37
	- Impact of Bio-methanation on Energy and Environment Scenario	38
	- Technology Options	38
	- Sludge Incineration Technology	38
	- Anaerobic Technology	38
	- Activated Sludge Process	38
	- Anaerobic Digestors - Types	38
3.2.2	Ethanol Conversion	39
4.	POWER GENERATION TECHNOLOGY AND SELECTION CRITERIA	40
4.1	Gasification Route	40
4.1.1	Operating Pressures of Gasifiers	41
	- Atmospheric	41
	- Pressurized	41
4.1.2	Pressurized Gasification for IGCC	41
4.1.3	Gas Turbine Alternatives	42
4.2	Biomass based Cogeneration	44
4.2.1	Cogeneration - The Concept	44
4.2.2	Benefits of Adopting High Efficiency Cogeneration Systems	45
4.2.3	Possible Models of Cogeneration	46
	A. Extraction-cum-Back Pressure Route	46
	B. Extraction and Condensing Route through Bagasse Fuel System	46
	C. Condensing Route based on Dual Fuel System	47
4.3	Combustion Route	47
4.3.1	Types of Combustion Systems	48
4.3.1.1	Manually Fired Furnaces	48
4.3.1.2	Automatic Stoking Systems	48
4.3.1.3	Pile Burning Systems	49
4.3.1.4	Grate Burning Systems	50
4.3.1.5	Suspension Burning Systems	50
4.3.1.6	Fluidized Bed Systems	50
4.4	Raw Material Management - Identification of Biomass Potential	52
4.4.1	Data Resource	54
4.4.1.1	Country wide Biomass Assessment Studies	55
4.4.1.2	Steps Involved in Fuel Assessment Exercise	55
4.4.1.3	Cogeneration Potential in India	56
4.5	Biomass Collection, Handling and Storage	56
4.5.1	Receiving and Unloading	57
4.5.2	Preparation and Transfer	57
	- Biomass Preparation (Processing) System	57

4.5.3	Storage and Retrieval	58
	- Sourcing of Biomass	59
4.5.4	Inplant Handling	60
	- Fuel Conveyor System	61
4.6	Biomass Utilisation Technologies - Alternative Schemes	61
4.7	Energy Plantations	61
4.7.1	Concept	62
4.7.2	Yield	64
4.7.2.1	Factors Affecting Yield in Energy Plantations	64
4.7.3	Management Practices	66
4.7.3.1	Fixing the Design Parameters	66
4.7.3.1.1	Ultimate Purpose of the Plantation	66
4.7.3.1.2	Final Selection of Tree Species	66
4.7.3.1.3	Area to be Cultivated	67
4.7.3.1.4	Optimisation of Water Resources	67
4.7.3.1.5	Minimum Area of Cultivation	67
4.7.3.1.6	Establishment of Some Important Parameters	68
4.7.4	Main Design Consideration of Energy Plantation	69
4.7.5	Appropriate Technical Solutions for Problems in Energy Plantation	69
4.7.6	Economic Parameters	69
4.7.6.1	Assumptions in the Economic Calculations	71
4.7.7	Non-energy Benefits of Energy Plantation	71
4.7.8	Seven Steps in Establishment to Assure Successful Hybrid Plantations	72
4.7.9	MNES Biomass Programme	72
4.7.9.1	Biomass Production	72
4.7.9.2	Tree Productivity Assessment	72
4.7.9.3	Training	73
4.8	Site Selection	74
4.8.1	Objective of Site Selection	74
4.8.2	Area of Search for Initial Site Selection	75
4.8.3	Detailed Site Investigation	75
4.8.4	Need for a Preliminary Station Layout	75
4.8.5	Factors Influencing Site Selection	76
4.8.5.1	Land Requirements	76
4.8.5.2	Cooling Water	76
4.8.5.3	Transmission	77

4.8.5.4	Geology	77
4.8.5.5	Site and Plant Levels	77
4.8.5.6	Access	77
4.8.5.7	Water Supplies for Makeup and Domestic Purposes	77
4.8.5.8	Ash and Dust Disposal	77
4.8.5.9	Environmental Considerations	78
4.9	Technology Selection	78
4.10	Risk Factors	78
5.	INSTALLATION OF BIOMASS POWER PROJECTS	87
5.1	Prefeasibility Study and Detailed Project Report for Biomass Power	87
5.1.1	Pre-investment Study	87
5.1.2	Detailed Project Report (DPR)	87
5.2	Sourcing of Finance and DPR Preparation	89
5.2.1	Detailed Project Report Preparation	89
5.2.1.1	Eligible Project Cost Components and Estimation of Capital Expenditure	89
	- Land and Site Development	90
	- Civil Works	90
	- Erected Plant and Machinery	90
	- Miscellaneous Fixed Assets	91
	- Technical Knowhow and Service Charges	91
	- Preliminary and Pre-operative Expenses	91
	- Contingency	91
	- Margin Money on Working Capital	91
	- Interest during Construction	91
5.3	Contract Expediting and Project Management in Installation of Biomass Power Project	91
5.3.1	Detailed Engineering	92
5.3.2	Role of BOT/BOOT/BOLT basis of Project Development	94
5.3.3	Manpower and Training	94
5.3.3.1	General	94
5.3.3.2	Operation and Maintenance Organisation	95
5.3.3.3	Training	95
5.4	Project Implementation Plan	97
5.4.1	Activities versus Time	97
5.4.2	Project Implementation Strategy	97
5.4.2.1	Project Schedule	97
5.4.2.2	Major Activities	97

5.4.3	Identification of Core Team	99
5.4.3.1	Project Team	99
5.4.3.2	The Responsibilities of the Management	99
5.4.4	The Construction Phase	99
5.4.5	Plant Commissioning	100
5.5	Operation, Maintenance and Control	100
5.5.1	Operation, Maintenance and Control Requirements	101
5.5.1.1	Operation Requirements	101
5.5.1.2	Maintenance Requirements	101
5.5.1.3	Controls - Instrumentation	102
5.5.1.4	Fire Protection System	103
5.6	Environment Impact Assessment and Waste Management	103
	General	103
5.6.1	Particulate Matter and Gases	104
5.6.2	Dry Fly Ash Furnace Bottom Ash	104
5.6.3	Water Pollution	104
5.6.3.1	Effluent from Water Treatment Plant	104
5.6.3.2	Chlorine in Cooling Water	104
5.6.3.3	Steam Generator Blow Down	105
5.6.4	Sewage from various Buildings in the Plant	105
5.6.5	Thermal Pollution	105
5.6.6	Noise Pollution	105
5.6.7	Monitoring of Effluents	105
6.	BIOMASS POWER PLANT DESCRIPTION	117
6.1	Layout	117
6.1.1	Power Plant Description	117
	- General	117
6.1.2	Selection of Cycle	117
6.1.3	Selection of Fuels	119
6.2	Major Components of Power Plant	119
6.2.1	Description of Components of a Biomass Combustion Power Plant	119
6.2.1.1	Mechanical System Description	119
	- General	119
6.2.1.1.1	Boiler and Auxiliaries	119
6.2.1.1.2	Turbine and Auxiliaries	121
6.2.1.1.3	Electricals	121
6.2.1.1.4	Instrumentation and Controls	121
6.2.1.1.5	Biomass Processing and Handling Equipments	121
6.2.1.1.6	Ash Handling System	121

6.2.1.1.7	Feed Water Systems	122
6.2.1.1.8	Water Treatment Systems	122
6.2.1.1.9	Condensor and Accessories	122
6.2.1.1.10	Cooling Tower	122
6.2.1.1.11	Outdoor Switchyard Equipment	122
6.2.2	Boiler and Auxiliaries	123
6.2.2.1	Boiler Emission	123
6.2.2.2	Auxiliaries	123
6.2.3	Turbines and Auxiliaries	123
6.2.4	Biomass Processing, Handling, Storage and Retrieval Systems	124
6.2.4.1	Biomass Processing System	124
6.2.4.2	B.omass Handling System	124
6.2.4.3	Fuel Conveyor System	124
6.2.4.4	Biomass Storage System	124
6.2.5	Feed Water System	125
6.2.5.1	Feed Pumps	125
6.2.5.2	Deaerator	125
6.2.5.3	Blowdown Heat Recovery	125
6.2.6	Condenser and Cooling Water System	125
6.2.6.1	Cooling System	125
6.2.6.2	Cooling Water Makeup	126
6.2.7	Potable Water System	126
6.2.8	Water Treatment Plant	126
6.2.8.1	Raw and Treated Water System	126
6.2.9	Water Pollution Control	126
6.2.10	Ash Handling System	126
6.2.11	Air Conditioning and Ventilation System	127
7.	ELECTRICAL UTILITY INTERTIES	128
	General	128
7.1	Generators	128
7.1.1	Induction Generators	128
7.1.2	Synchronous Generators	129
7.1.3	Efficiency and Power Factor	129
7.1.4	Voltage Regulation and Harmonic Content	129
7.2	Electric Utility Interconnection	130
7.2.1	Utility Grids	130

7.2.2	System Protection	130
7.2.3	Loss of Synchronization	130
7.2.4	Interconnection Equipment	132
7.2.5	Circuit Breakers	132
7.2.6	Protective Relays	132
7.2.7	Disconnect Switches	132
7.2.8	Electric Meters	132
7.3	Utilisation of Exportable Power	133
7.3.1	Utilisation of Exportable Power	133
7.3.1.1	Supply to Ancillary Units	133
7.3.1.2	Supply to other Manufacturing Units of the Promoters	133
7.3.1.3	Supply to other End-users/Third Party	133
7.3.1.4	Sale to Electricity Boards	133
7.3.2	Sale of Exportable Power	135
7.3.3	Options of Supply	135
7.3.3.1	Peak / Off-peak Supply	135
7.3.3.2	Rate	135
7.3.3.3	Reactive Power	136
7.3.3.4	Minimum Level of Supply	136
7.3.3.5	Radial Supply	136
8.	TECHNO-ECONOMIC ASPECTS OF BIOMASS POWER PROJECTS	163
	General	163
8.1	Technical Feasibility	164
8.2	Financial Viability	164
8.3	Market Viability	174
8.4	Key Management Areas and Project Risk Factors	174
8.5	Project Design	175
9.	INSTITUTIONAL FRAMEWORK	176
9.1	The Renewable Energy Programme in India	176
9.2	Policy Framework for Renewables	176
9.3	Role of MNES / IREDA	178
9.3.1	The IREDA Model	178
9.3.1.1	Mission and Objectives	178
9.3.1.2	IREDA's Lending Activities	178
9.3.1.3	Promotional Activities	179
9.3.1.4	Performance Highlights	179

9.3.1.5	International Assistance	180
9.3.1.6	Networking	180
9.3.1.7	Role of IREDA in Development of Biomass Power Projects	180
	- Policy Level	180
	- Operational Level	180
9.4	MNES National Programme on Biomass Power / Cogeneration	181
9.4.1	Present MNES Programme	181
9.4.2	MNES Ninth Plan Proposals	182
9.4.3	Main Issues considered by MNES	183
9.5	Current Status of Biomass based Power Generation	183
9.6	Review of Central / State Policies	184
9.6.1	Central Policies and Incentives	184
9.7	Financing and Co-financing	184
	(a) Debt, Equity and Central / State Subsidies	184
	(b) Lease Financing	184
9.8	Major System Designers, Equipment Suppliers and Consultants (National and International)	186
9.9	Major Financial Institutions, MNES Regional Offices, State Nodal Agencies and State Technical Consultancy Organisations	193
10.	COMMISSIONED PROJECTS AT A GLANCE - INDIA AND OVERSEAS	199
10.1	Commissioned Projects at a Glance - India	199
10.2	Commissioned Projects at a Glance - Overseas	202
11.	THE FUTURE PROSPECTS	209
	- Present Trend	209
	- Constraints	209
	- Steps for Improvement	210
	- Renewable Energy Movement	211
	BIBLIOGRAPHY	212
	INDEX	214
