

CONTENTS

FOREWORD	iii
Chapter - 1 : Pumped Storage Schemes	
1.1 Introduction	1
1.2 Pumped Storage Schemes	1
1.3 Principle of Pumped Storage Schemes	2
1.4 Pumped Storage Power Schemes vis-a-vis conventional Hydro Electric Power Schemes	3
1.5 Categorisation of Pumped Storage Schemes	3
1.6 Role of Pumped Storage Schemes	4
1.7 Favourable Factors for Installation of Pumped Storage Schemes	7
References	8
Chapter - 2 : Pumped Storage Schemes in Indian Context	
2.1 Trend of Development	9
2.2 Present Status of Installation	10
2.3 Future Development	14
2.4 Need for Accelerated Development	15
References	15
Chapter - 3 : Pumped Storage Schemes Installed in India	
3.2 Nagarjunasagar PSS (4 x 100 + 3 x 100 MW) - Andhra Pradesh	16
3.3 Paithon (Jayakwadi) PSS (1 x 12 MW) - Maharashtra	21
3.4 Kadamparai PSS (4 x 100 MW) - Tamil Nadu	21
3.5 Kadana Stage-I PSS (2 x 60 MW) + Kadana Stage-II (Unit of 60 MW) - Gujarat	24
3.6 Panchet Hill Unit-2 (1 x 40 MW) - Damodar Valley Corporation-Bihar	27
3.7 Ujjani PSS (1 x 12 MW) - Maharashtra	29
3.8 Bhira Pumped Storage Scheme (1 x 150 MW) - Maharashtra (Tata Electric Company)	31
References	34
Annexures	35
Chapter - 4 : Future Pumped Storage Schemes in India	
4.1 Schemes Sanctioned/Under Execution	53
4.2 Ghatghar PSS (2 x 125 MW) - Maharashtra	53
4.3 Sardar Sarovar PSS (6 x 200 MW) - Gujarat (Under Sardar Sarovar Nigam Limited)	54
4.4 Srisaillam LBPH PSS (6 x 150 MW) - Andhra Pradesh	56
4.5 Unit 2 of 60 MW of Kadana Stage II PSS (2 x 60 MW) - Gujarat	59
4.6 Purulia PSS (4 x 225 = 900 MW) - West Bengal	59
4.7 Schemes Cleared by CEA	61
4.8 Tehri Stage II PSS (4 x 250 MW) - Uttar Pradesh (for Execution by Tehri Hydro Development Corporation)	63
4.9 Bhivpuri Pumped Storage Scheme (1 x 90 MW) - Maharashtra (for Execution by Tata Electric Company in Private Sector)	63
4.10 Schemes Identified by CEA	68
References	69
Annexures	70
Chapter - 5 : Planning Aspects of Pumped Storage Schemes	
5.1 Introduction	87
5.2 Objectives of Planning a PSS	87
5.3 Prime Considerations in Planning a PSS	87
5.4 Justification of Need of Installation of a PSS	88

5.5	Location of a Pumped Storage Power Plant	88
5.6	River Basin Planning	91
5.7	Decision on Operating Criteria	91
5.8	Site Selection for Upper and Lower Reservoirs	92
5.9	Optimisation of Upper and Lower Reservoirs	92
5.10	Site Selection for Water Conductor System	95
5.11	Selection of Site, Type and Layout of Power House	95
5.12	Cycle Efficiency	96
5.13	Determination of Installed Capacity	96
5.14	Selection of Unit Rating and Number of Units of Power House	97
5.15	Economic Considerations	98
5.16	Construction Work Schedule	98
5.17	Transmission and Sub-station Facilities	99
5.18	Planning for Construction Material, Methodology and Equipment	99
5.19	Organisation Planning	100
5.20	Environmental Aspects	100
5.21	Scope for Future Planning	101
	References	102

Chapter - 6 : Preliminary Design Aspects of Pumped Storage Schemes

6.1	Introduction	103
6.2	Civil Works	103
6.3	Electrical/Mechanical Equipment	107
6.4	Pump/Turbine	108
6.5	Electrical Equipment	112
6.6	Overall Dimensioning of Power House	115
6.7	Additional Considerations	116
	References	116

Chapter- 7 : The World Scenario of Development of Pumped Storage Power Plants

7.1	Introduction	117
7.2	The World's Pumped Storage Power Plants in Operation	118
7.3	World's Future Pumped Storage Power Plants	118
	References	118
	Annexure	120
