GOVERNMENT OF INDIA
MINISTRY OF NEW AND RENEWABLE ENERGY

4th February, 2015

MESSAGE

Power is one of the key infrastructures for growth of Industry and economy. Power from Renewable Sources contributes about 35 GW accounting for about 13% of the total installed capacity in the country. There is a plan to add about 100 GW of solar power, 60 MW of wind power, 5 MW of power from small hydro plants and 10 MW from biomass and bagasse cogeneration plants by the year 2022. Thus, the future for providing clean energy is by adding more power from RE sources.

I am happy to learn that IREDA has prepared a "Compendium of Regulatory and Tariff orders issued by CERC and State Regulatory Commissions on Renewable Energy Sector in India."

The Compendium contains various state level information such as tariff and regulations, eligibility and qualifying criteria, renewable purchase obligation, power evacuation facilities, wheeling and banking charges, framework for grid connectivity, incentives for different RE technologies, financial aspects etc. and all those features related to Renewable Energy Sector in this regard.

I appreciate the efforts made by IREDA to bring out this document with the objective of dissemination of information to all the entrepreneurs and stakeholders of Renewable Energy Sector which will prove to be very handy to all of them. I am sure that this Compendium will go a long way in development of Renewable Energy sector in India.
